Helicopter Portable Fuel Tanks
For Remote Mineral Exploration, Drillers, Camps, & Helicopter Operations

Specifications

- Two tank size models: 110 and 230 Gallon Capacities
- Vertical cylindrical design with low center of gravity for stability on uneven ground
- Double wall aluminum cylindrical tank construction powder coated white to minimize thermal expansion
- The annular space between the tanks has a screened vent cap that is removable for inspection
- Welded discharge drop pipe, drill rig generator connections, and 2" vented fill cap
- Tanks are serial numbered & pressure tested to NFPA 30 standards
- 3-point optional sling assembly is custom sewn, high-quality & load rated with U.S manufactured hardware
