# FLEXIBLE HEATER DUCTING

### Application:

In extreme weather conditions, deliver indirect preheated air from ground heating equipment to various portable and permanent shelters.

### Available Diameters:

6-inch, 12-inch, 16-inch and 20-inch  
(152mm, 305mm, 406mm & 508mm)

Call for other custom sizes

### Features:

- Special Flexible Reinforced Coated Fabric
- Air-inlet end lined for intense heat.
- Heavy Duty - 'Mil-Spec' Black extruded PVC wearstrip (scuff strip) to resist ground dragging abrasion.
- Lock-stitch sewn construction
- Grounded for safe discharge of static electricity.
- Only fire resistant materials used.
- Ducts are manufactured to equal or exceed MIL-H7365D: Hose, Air Duct for Ground Heaters.

### Pitch (distance between wire):

6-inch diameter – 4-inch pitch  
(152mmØ - 102mm pitch)  
12-inch and greater diameters – 6-inch or 7-inch pitch (as specified)  
(305mmØ - 152mm or 178mm pitch)

### Coupling System:

- Stainless Steel quick-disconnect J-Lock coupling.
- Attached storage device.

### Standard Lengths:

15 foot and 25 foot  
(4.6M and 7.6M)  
Call for custom lengths

### Temperature Handling:

Range: -65°F to 350°F  
(-54°C to 176°C)

### Standard Colors:

Forest Green & Yellow  
(Fed Std. 24052 & 23538)
